PROFILE

Since writing my first line of code, I knew that the world of technology was where I could grow. From small projects to scalable modern applications, every challenge has shaped me into a Web Developer who values both the process and the results. For me, building digital solutions is not just a job — it's a way to turn ideas into meaningful realities.

PROJECTS

2025 - Student Attendance App Using Face Recognition

- A student attendance system using facial recognition technology to automatically record attendance, improving efficiency and accuracy. Although still in development, it is already functional and aims to be even more useful in the future.
- Technologies: Laravel, Bootstrap, Node.js, MySQL, Python, Face Recognition, Filament
- Features: Face Scan, Attendance Management, Face Similarity

2025 - Accreditation Document Management System

- An application designed to help the Informatics Management Department improve accreditation scores by simplifying document management, including uploading, categorization, and search.
- Technologies: Laravel, Bootstrap, Node.js, MySQL
- Features: Filtering, Authentication, Data Management, Encryption

2025 - Internal Audit System for Universitas Sriwijaya

- A system designed to help Universitas Sriwijaya manage and monitor internal audit processes efficiently. Currently in testing and still under development.
- Technologies: Laravel, Bootstrap, Tailwind, Node.js, MySQL
- Features: Role-Based Access, Data Management, User-Friendly Interface, Data AP
